Description of each database in Lexi-CLINICAL SUITE:

Lexi-Drugs

Our most comprehensive individual drug database, with content that addresses all patient populations and clinical specialties. Independently ranked as the #1 drug database in numerous reviews and studies.

Lexi-Interact

Perform an analysis of a patient's entire drug and natural product profile, identify potential interactions, and obtain patient management options.

Pediatric Lexi-Drugs

This database is designed for situations where pediatric and neonatal dosing information is required. Contains very detailed guidelines that have been researched and compiled by pediatric specialists.

Lexi-Lab & Diagnostic Procedures

Access information on patient preparation, specimen collection and handling, and test result interpretation within numerous clinical areas and diagnostic disciplines.

Lexi-Infectious Diseases

Assists in the diagnosis and treatment of infectious diseases - combining information on disease syndromes, organisms, diagnostic tests, and antimicrobial therapy into one, easy-to-use reference.

Lexi-Tox

Monographs address the most commonly encountered exposures to poisons and non-toxic agents, antidotes/decontaminants, and household products.

Dental Lexi-Drugs

Information on commonly prescribed medications and supplemental products, including key dental health fields such as local/vasoconstrictor precautions, effects on dental treatment, and dental dosing for selected drug classifications.

Lexi-Companion Guides

Features tables and charts on topics including adult and pediatric ACLS algorithms, comparison drug charts, therapy recommendations and more. Derived from our Companion Guide book series.

Lexi-Drug Allergies

Addresses drug allergies, including reactions by drug class, considerations when managing patients with reported allergies, and more. This resource is based on integration of

scientific and clinical literature and offers unique insight on allergic mechanisms, concepts, and categorizations.

Lexi-Pregnancy & Lactation

Offers in-depth, detailed content on drug use during pregnancy and breast-feeding. This evolving database reviews the most commonly-used drugs for women of reproductive age and pregnant women.

Lexi-Drug ID

A text-based program designed to identify drugs based on imprint, dosage form, shape, and color.

Lexi-I.V. Compatibility

Access detailed content from the King Guide to Parenteral Admixtures with complementary information from Lexi-Comp to determine if drugs are compatible and with which solutions compatibility is maintained.

Lexi-Natural Products

Provides information on the most commonly used natural products, including herbs, vitamins, minerals, nutraceuticals, glandulars, and amino acids.

Lexi-PALS (Patient Advisory Leaflets)

Concise, easy-to-understand, leaflets covering adult and pediatric medications, presented in a question and answer format ideal for patient counseling.

Lexi-Pharmacogenomics

Stay informed about this expanding clinical field with the first in the industry resource that addresses key genetic variations that may influence drug disposition and response. Medical Abbreviations by Neil Davis This database provides critical support for safe reading and transcribing of medical records, correspondence, and prescriptions. Based on the popular print title by Neil Davis.

Nursing Lexi-Drugs

A valuable resource for nurses and nursing students. Key fields of information include administration, monitoring, dosing, and patient education.

Lexi-CALC

Medical calculations designed to assist with drug dosing, drip rates, and organ function assessment in both adults and children.
